

MUHAMMAD SHAHAN

Software Engineering Student | Backend Developer

Khyber Pakhtunkhwa, Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineering student focused on backend development and practical software projects. Hands-on experience building REST APIs with FastAPI, authentication with Supabase, web applications, and Python automation. Comfortable with debugging, API testing, Git/GitHub, and turning project requirements into working implementations.

EDUCATION

BS Software Engineering - Riphah International University

Current student | CGPA: 3.2

EXPERIENCE

AI Fluency & Backend Internship - FlyRank (Remote)

- Built and tested backend projects including REST APIs, authentication flows, scraping/data-validation workflows, and AI-assisted portfolio work.
- Used Claude/ChatGPT, Git/GitHub, local filesystem connectors, Swagger UI, and structured build/evaluation workflows while documenting implementation decisions.

SELECTED PROJECTS

Book Scraper - Python, Requests, BeautifulSoup, Pydantic

- Scraped 60 books from three pages, converted messy price/rating text into clean data, validated every record with Pydantic, handled retries/failures, and saved validated output to JSON.

Auth API - FastAPI, Supabase Auth, JWT

- Implemented signup, login, logout, public and protected routes, Bearer-token authentication, token verification, and Swagger-based API testing.

Task API - FastAPI, SQLite, Docker

- Built CRUD endpoints for tasks with persistent SQLite storage, validation/error handling, Swagger documentation, Git version control, and Docker containerization.

FastBite Food Ordering Website - HTML, CSS, JavaScript, PHP, MySQL

- Developed menu, cart, authentication, sessions, and database-backed login/register features using prepared statements and password hashing.

TECHNICAL SKILLS

Languages: Python, Java, C++, HTML, CSS, JavaScript, PHP

Backend & Data: FastAPI, REST APIs, Supabase Auth, SQLite, MySQL, JSON, Pydantic

Tools: Git, GitHub, Docker, Swagger UI, VS Code, XAMPP, Postman/API testing concepts

ADDITIONAL

Interests: Backend Development, Cloud Computing, DevOps, System Design, AI-assisted software workflows
